## How's Your Liver?

Is the Oriental salutation, knowing that good health cannot exist without a healthy Liver. When the Liver is torpid the Bowels are sluggish and constipated, the food lies in the stomach undigested, poisoning the blood; frequent headache ensues; a feeling of lassitude, despondency and nervousness indicate how the whole system is deranged. Simmons Liver Regulator has been the means of restoring more people to health and happiness by giving them a healthy Liver than any agency known on earth. It acts with extraordinary power and efficacy.

**NEVER BEEN DISAPPOINTED.**  
As a general family remedy for dyspepsia, Torpid Liver, Constipation, etc., I hardly ever see anything else, and have never been disappointed in the effect produced. It seems to be almost a perfect cure for all diseases of the stomach and bowels.  
W. J. McClellan, Macon, Ga.

**Armour and Field.**  
We learn that when reports of the late Cyrus W. Field's financial embarrassment began to be circulated Mr. P. D. Armour, of this city, communicated to Dr. Henry M. Field the willingness of certain western friends to provide his brother with the means to repair his shattered fortunes. This proffer gave the dying man great solace and gratification, but it was declined. —(Chicago News-Record.)

**The Loadstone of the Chinese.**  
The Chinese carried their loadstone as conductor in front of them, in the form of an animal, the arms always pointing toward the south, which is opposite to what modern scientists suppose the needle is pointing, viz., toward the north. —New York Telegram.

**Not Old by Any Means.**  
Dumley—Brown, I understand that Robinson referred to me yesterday as an old fool. I don't think that sort of thing is right.  
Brown—Why of course it isn't right Dumley. You can't be more than forty at the outside. —Exchange.

**Rural Delights.**  
Jinks—Boarding in the country now eh? What do you do with yourself even ings?  
Winks—Some nights I sit outdoors to keep cool and other nights I go to bed to keep warm. —New York Weekly.

There exists in Chicago a society the membership of which is restricted to colored men with white wives. The object is to benefit a class of persons who, for their inter-racial marriage, are ostracized by both blacks and whites.

The keen notice of trifles and the rapid matching in the mind of cause and effect, constitute what may be called the detective quality, which belongs to its highest grade to great inventors or naturalists.

In East or West, or North or South, They to themselves an outrage do, Who cannot boast a fresh sweet month, With teeth like pearls begemmed with dew  
When SOZODONT all this supplies, And works the charm before our eyes.

THE CHOLERA IN NEW YORK.

President Harrison Sends His Regrets—Corbett Wants to Meet Charley Mitchell.  
Cholera.  
New York, September 12.—The steamer Wieland of the Hamburg line has been secured on behalf of the Chamber of Commerce for the reception of the quarantine passengers. Arrangements were made to land where in the future each immigrant landing at Ellis Island will be provided with a card declaring that the bearer and baggage have been disinfected and fumigated and in good health. The cards will be signed by Dr. Wheeler, surgeon of the marine hospital service, and will be worn as a label pinned to the clothes. The petition, signed by many New Yorkers, headed by Dr. Robertson, asking for the removal of Health Officer Jenkins and the appointment of an advisory board of physicians has not yet been presented to Gov. Flower. The Governor has issued a proclamation ordering the Sheriff of Suffolk county to use all in his power in resisting any interference with the State authorities in occupying Fire Island. The officials of the Hamburg-American line obtained permission from Health Officer Jenkins a week ago to allow a special physician of the company to board the Regia on condition that he would remain until all the passengers were released. The physician sent was Dr. Spiegelitz. This morning his first official report was received. He says in part: "I found everything in good condition except that there was dirt in the steerage. In the rooms in which I was introduced as the ship's hospital it looked as if all the unwashed people in the world were there. Dr. Jenkins' delay in removing the sick and the suspicious cases is to be condemned. It is a great wonder to me that fifty of the people did not die."  
WASHINGTON, September 12.—Secretary Charles Foster returned to Washington from New York last night. Before leaving New York the Secretary saw Health Officer Jenkins and had a satisfactory interview relative to the disposition of the passengers awaiting admission to the United States and other matters connected with cholera. The treasury officials view with equanimity the failure of the attempt of the New York authorities to secure Fire Island as a place of detention for the Normania's cabin passengers. But if the State authorities finally succeed in preventing Judge Barnard's injunction from being made permanent and are still resisted in their attempts to occupy Fire Island, the Federal Government may again intervene and give a permanent foothold on terra firma to the unfortunate passengers. The Monitor and Miantonomah, which are now near by in New London, Conn., or the Philadelphia, supposed to be en route to Baltimore from New York, may be called into service. Either of these vessels lying off Fire Island might easily command the situation and afford an opportunity for the landing of militia or passengers.

Killed Because He Was An American.  
London, September 12.—The latest advice received from Genoa regarding the murder of Frank Reilly, a seaman of the United States steamer Newark, who was killed in a lodging house in Genoa, shows that national animus against Americans was the cause of the crime. The proprietor of the lodging house when the Newark's men applied for lodgings, used most abusive language to them simply because they were Americans. One of those present, knowing the proprietor, advised the men that it was unsafe for them to remain in the place. All of the sailors started for the door, whereupon the proprietor, with a knife in each hand, sprang toward Reilly and struck both weapons in his back. Reilly staggered to the street, where he fell and died in a few minutes. The murder was entirely unprovoked and Reilly was killed for no other reason than that he was an American. In consequence of the killing of Reilly the sailors of the United States vessels are not allowed to go on shore while they remain at Genoa.  
Champion Corbett.  
New York, September 12.—When Corbett's train pulled into Wilmington, the throng was so great the train had to come almost to a standstill to avoid accident. At Philadelphia the throng was also great but fortunately the bulk of the people kept outside the iron fence. Corbett says the man above all others in the world he wants to meet is Charley Mitchell. He has made up his mind to make Mitchell a more fighting and less talking. A large throng was at the Jersey City depot when Corbett's train arrived there and it was with difficulty the police opened up a way and got the pugilist on the ferry boat. He had a pressing invitation to go up to the New York Athletic Club, but he went directly to his own home. He intends making New York City his permanent home.

They Won't Take Any Chances.  
Fire Island, N. Y., September 12.—At 9:45 this afternoon the steamer Cepheus reached the dock here, which was densely crowded with fair citizens, armed with shot guns, clubs, etc., who prevented a line from the boat being attached, and notwithstanding the entreaties of the Captain and passengers, they refused to let any one land. The Captain backed out, turned around again and attempted to land. In this he was unsuccessful, although a man shouted that they had Governor Flower's order to land. Dr. Volpert went off in a rowboat to confer with the officials on the Cepheus. This afternoon the Cepheus is lying at anchor.  
Doctors Summoned for Mrs. Harrison.  
SARANAC LAKE, N. Y., September 12.—A special train came up from Loon Lake this morning for Dr. Trudeau of the sanitarium. A team was got in shape hurriedly and the doctor brought from Amherst, where he is stopping. A reporter of the Associated Press saw him as he was getting on the train, but he would say nothing regarding Mrs. Harrison. Dr. Gardner, Mr. Harrison's physician, is also at Loon Lake.  
President Harrison's Regrets.  
New York, September 12.—President Harrison telegraphed to Chairman Hackett of the Republican State Executive Committee that he greatly regrets to confirm the dispatch of to-day that Mrs. Harrison's condition is such as to make it impossible to take the trip through this State.  
A Tulare Fire.  
TULARE, Cal., September 12.—The Mechanic's Hotel, an inflammable wooden structure and two Chinese wash houses were destroyed last night by fire. Loss, \$3,000. The remains of the colored man named Thomas Stegall were found in the ruins this morning.  
Another Strike.  
PITTSBURGH, September 12.—All of the 8,000 coal miners in the River district formally struck to-day on one-half of a cent reduction made by the operators. Half of the miners are organized and prepared for the struggle.  
Cholera at Empire, Nevada.  
VIRGINIA, Nev., September 12.—A man named Gland died at Empire to-day. The doctors report that death was from genuine cholera.  
THE S. F. & G. S. L. RAILROAD.  
Surveys Are Nearly All Completed.  
The San Francisco Daily Report has the following relative to the new railroad:  
The affairs of the San Francisco & Great Salt Lake railway are in fine shape and the prospects of the road never looked better than they do now.  
"When we come before the public," E. L. G. Siegel of the Board of Directors said to-day, "it will be as if the road were built." He looked decidedly cheerful as he spoke and it is known that decidedly reassuring additions to the list of subscribers to the stock have been received—men who not only subscribe themselves, but whose example will certainly induce others to follow. They are the names of big men of affairs. The Great Salt Lake line will be strongly backed financially before anything of a definite nature is made public regarding its financial arrangements.  
In brief, any doubt that may have existed as to the building of the San Francisco & Great Salt Lake railway is now removed. The great independent competing road will be built, will be built soon, and will be built with California capital.  
While the financial arrangements of the company have been satisfactorily progressing, the engineering arrangements have by no means been neglected. The survey of the route has so far progressed that it will be completed within a month or six weeks.  
Four surveying parties are now in the field between Suisun bay and Beckworth pass, including one party that began its work above Big Bend, on the Feather river, yesterday. Another party has surveyed a line into the San Joaquin valley for the proposed feeder of the main Great Salt Lake railway, and this survey has exposed some poor engineering work on the part of Southern Pacific engineers. The Salt Lake road's surveyors have had the pleasure, therefore, of profiting by the Southern Pacific's mistakes.  
The last surveying party sent out was in charge of Emory Oliver. Mr. Oliver, as said above, began work yesterday at a point above Big Bend, on the Feather. The survey from Beckworth pass to the point where Mr. Oliver began work is nearly completed. It has been made under Surveyor K. die of Quincy, and will be finished by the end of next week. Then the route from Beckworth pass—in fact, from the State line—will be completely surveyed from that point to and above Big Bend and from Oroville to Suisun bay. Mr. Oliver's instructions are to go ahead as rapidly as possible and make a permanent survey from his point of beginning on the Feather to Oroville. Then the chain will be complete.  
As the general route is now known, there is no further concealment to be made of the fact that the San Francisco & Great Salt Lake railway will have a shorter route from San Francisco to Sacramento, and into the San Joaquin valley—much shorter than the Sacramento-side from Contra Costa county at a point near New York landing—sometimes called Black Diamond. Thence it runs direct to Sacramento, and thence direct to Oroville.

THE CHOLERA IN NEW YORK.

President Harrison Sends His Regrets—Corbett Wants to Meet Charley Mitchell.  
Cholera.  
New York, September 12.—The steamer Wieland of the Hamburg line has been secured on behalf of the Chamber of Commerce for the reception of the quarantine passengers. Arrangements were made to land where in the future each immigrant landing at Ellis Island will be provided with a card declaring that the bearer and baggage have been disinfected and fumigated and in good health. The cards will be signed by Dr. Wheeler, surgeon of the marine hospital service, and will be worn as a label pinned to the clothes. The petition, signed by many New Yorkers, headed by Dr. Robertson, asking for the removal of Health Officer Jenkins and the appointment of an advisory board of physicians has not yet been presented to Gov. Flower. The Governor has issued a proclamation ordering the Sheriff of Suffolk county to use all in his power in resisting any interference with the State authorities in occupying Fire Island. The officials of the Hamburg-American line obtained permission from Health Officer Jenkins a week ago to allow a special physician of the company to board the Regia on condition that he would remain until all the passengers were released. The physician sent was Dr. Spiegelitz. This morning his first official report was received. He says in part: "I found everything in good condition except that there was dirt in the steerage. In the rooms in which I was introduced as the ship's hospital it looked as if all the unwashed people in the world were there. Dr. Jenkins' delay in removing the sick and the suspicious cases is to be condemned. It is a great wonder to me that fifty of the people did not die."  
WASHINGTON, September 12.—Secretary Charles Foster returned to Washington from New York last night. Before leaving New York the Secretary saw Health Officer Jenkins and had a satisfactory interview relative to the disposition of the passengers awaiting admission to the United States and other matters connected with cholera. The treasury officials view with equanimity the failure of the attempt of the New York authorities to secure Fire Island as a place of detention for the Normania's cabin passengers. But if the State authorities finally succeed in preventing Judge Barnard's injunction from being made permanent and are still resisted in their attempts to occupy Fire Island, the Federal Government may again intervene and give a permanent foothold on terra firma to the unfortunate passengers. The Monitor and Miantonomah, which are now near by in New London, Conn., or the Philadelphia, supposed to be en route to Baltimore from New York, may be called into service. Either of these vessels lying off Fire Island might easily command the situation and afford an opportunity for the landing of militia or passengers.

Killed Because He Was An American.  
London, September 12.—The latest advice received from Genoa regarding the murder of Frank Reilly, a seaman of the United States steamer Newark, who was killed in a lodging house in Genoa, shows that national animus against Americans was the cause of the crime. The proprietor of the lodging house when the Newark's men applied for lodgings, used most abusive language to them simply because they were Americans. One of those present, knowing the proprietor, advised the men that it was unsafe for them to remain in the place. All of the sailors started for the door, whereupon the proprietor, with a knife in each hand, sprang toward Reilly and struck both weapons in his back. Reilly staggered to the street, where he fell and died in a few minutes. The murder was entirely unprovoked and Reilly was killed for no other reason than that he was an American. In consequence of the killing of Reilly the sailors of the United States vessels are not allowed to go on shore while they remain at Genoa.  
Champion Corbett.  
New York, September 12.—When Corbett's train pulled into Wilmington, the throng was so great the train had to come almost to a standstill to avoid accident. At Philadelphia the throng was also great but fortunately the bulk of the people kept outside the iron fence. Corbett says the man above all others in the world he wants to meet is Charley Mitchell. He has made up his mind to make Mitchell a more fighting and less talking. A large throng was at the Jersey City depot when Corbett's train arrived there and it was with difficulty the police opened up a way and got the pugilist on the ferry boat. He had a pressing invitation to go up to the New York Athletic Club, but he went directly to his own home. He intends making New York City his permanent home.

They Won't Take Any Chances.  
Fire Island, N. Y., September 12.—At 9:45 this afternoon the steamer Cepheus reached the dock here, which was densely crowded with fair citizens, armed with shot guns, clubs, etc., who prevented a line from the boat being attached, and notwithstanding the entreaties of the Captain and passengers, they refused to let any one land. The Captain backed out, turned around again and attempted to land. In this he was unsuccessful, although a man shouted that they had Governor Flower's order to land. Dr. Volpert went off in a rowboat to confer with the officials on the Cepheus. This afternoon the Cepheus is lying at anchor.  
Doctors Summoned for Mrs. Harrison.  
SARANAC LAKE, N. Y., September 12.—A special train came up from Loon Lake this morning for Dr. Trudeau of the sanitarium. A team was got in shape hurriedly and the doctor brought from Amherst, where he is stopping. A reporter of the Associated Press saw him as he was getting on the train, but he would say nothing regarding Mrs. Harrison. Dr. Gardner, Mr. Harrison's physician, is also at Loon Lake.  
President Harrison's Regrets.  
New York, September 12.—President Harrison telegraphed to Chairman Hackett of the Republican State Executive Committee that he greatly regrets to confirm the dispatch of to-day that Mrs. Harrison's condition is such as to make it impossible to take the trip through this State.  
A Tulare Fire.  
TULARE, Cal., September 12.—The Mechanic's Hotel, an inflammable wooden structure and two Chinese wash houses were destroyed last night by fire. Loss, \$3,000. The remains of the colored man named Thomas Stegall were found in the ruins this morning.  
Another Strike.  
PITTSBURGH, September 12.—All of the 8,000 coal miners in the River district formally struck to-day on one-half of a cent reduction made by the operators. Half of the miners are organized and prepared for the struggle.  
Cholera at Empire, Nevada.  
VIRGINIA, Nev., September 12.—A man named Gland died at Empire to-day. The doctors report that death was from genuine cholera.  
THE S. F. & G. S. L. RAILROAD.  
Surveys Are Nearly All Completed.  
The San Francisco Daily Report has the following relative to the new railroad:  
The affairs of the San Francisco & Great Salt Lake railway are in fine shape and the prospects of the road never looked better than they do now.  
"When we come before the public," E. L. G. Siegel of the Board of Directors said to-day, "it will be as if the road were built." He looked decidedly cheerful as he spoke and it is known that decidedly reassuring additions to the list of subscribers to the stock have been received—men who not only subscribe themselves, but whose example will certainly induce others to follow. They are the names of big men of affairs. The Great Salt Lake line will be strongly backed financially before anything of a definite nature is made public regarding its financial arrangements.  
In brief, any doubt that may have existed as to the building of the San Francisco & Great Salt Lake railway is now removed. The great independent competing road will be built, will be built soon, and will be built with California capital.  
While the financial arrangements of the company have been satisfactorily progressing, the engineering arrangements have by no means been neglected. The survey of the route has so far progressed that it will be completed within a month or six weeks.  
Four surveying parties are now in the field between Suisun bay and Beckworth pass, including one party that began its work above Big Bend, on the Feather river, yesterday. Another party has surveyed a line into the San Joaquin valley for the proposed feeder of the main Great Salt Lake railway, and this survey has exposed some poor engineering work on the part of Southern Pacific engineers. The Salt Lake road's surveyors have had the pleasure, therefore, of profiting by the Southern Pacific's mistakes.  
The last surveying party sent out was in charge of Emory Oliver. Mr. Oliver, as said above, began work yesterday at a point above Big Bend, on the Feather. The survey from Beckworth pass to the point where Mr. Oliver began work is nearly completed. It has been made under Surveyor K. die of Quincy, and will be finished by the end of next week. Then the route from Beckworth pass—in fact, from the State line—will be completely surveyed from that point to and above Big Bend and from Oroville to Suisun bay. Mr. Oliver's instructions are to go ahead as rapidly as possible and make a permanent survey from his point of beginning on the Feather to Oroville. Then the chain will be complete.  
As the general route is now known, there is no further concealment to be made of the fact that the San Francisco & Great Salt Lake railway will have a shorter route from San Francisco to Sacramento, and into the San Joaquin valley—much shorter than the Sacramento-side from Contra Costa county at a point near New York landing—sometimes called Black Diamond. Thence it runs direct to Sacramento, and thence direct to Oroville.

## Don't Get Frightened.

By reference to our telegraphic report on another page it will be seen that a man by the name of Gland died at Empire, near Carson City, yesterday from what the physicians claim to be a case of genuine cholera. Now, good people, don't make fools of yourselves and go into hysterics over the announcement. Bear in mind the fact that physicians are not above making mistakes. Our climate and healthful surroundings are above allowing any disease of this character from taking a hold in our midst, but as a precautionary measure, not only for the prevention of cholera—and we don't think that will ever cause any trouble in Nevada—but for our own good in many other respects, let everyone constitute themselves a committee of one to clean away the accumulated garbage in their back yards, see that the sewers are in good working order and give your premises an entire going over. If this is done the townspeople will be free from every disease of whatever kind or nature. It is probable that our telegraphic reports to-morrow will contradict the statement contained in this issue that the man Gland died of cholera.

## Delegates to the Silver Convention.

Following are the names of the delegates elected to represent the Washoe Silver League at the Silver party Convention to be held at Winnemucca on next Thursday, the 15th instant:

N. J. Foxwell,	J. P. Foulk,
E. F. Beck,	B. F. Leese,
Houshner and Fine Orr,	F. O. Urdike,
G. E. Housworth,	R. Ryland,
T. V. Julien,	S. Jacobs,
F. M. Lee,	Dr. H. Bergstein,
J. N. Evans,	John Boynton,
C. A. Norcross,	E. D. Kelley,
H. L. Fish,	R. C. Leeper,

## Season Tickets.

Season tickets were placed on sale yesterday at the First National Bank, Bank of Nevada and the office of the Secretary. Double season ticket, \$5, admitting man and wife and children under 15 years of age to both the track and Pavilion. Single season tickets, admitting gentlemen or lady, \$2. Every resident of Reno should purchase a ticket and attend the Fair.

## Splendid Tribute

THE SAN FRANCISCO BOARD OF HEALTH

URGES THE USE OF THE

## Royal Baking Powder.

The magnificent tribute of the San Francisco Board of Health to the great purity and wholesomeness of the Royal Baking Powder greatly disturbs the manufacturers of the lower grade powders. Their envious publications, however, cannot break the force of this unsolicited and unbiased, high medical endorsement. Attached is a certified copy of their original report, with the signatures of the members of the Board in fac-simile:

We, the members of The Board of Health of the City and County of San Francisco, cordially approve and recommend the Royal Baking Powder. It is absolutely pure and healthful, composed of the best ingredients of the highest strength and character.

In our judgment it is impossible to make a purer or stronger Baking Powder than the "Royal."

## LOVELOCK ITEMS.

Farming, Mining and Miscellaneous Matters. New Era.

L. N. Carpenter is loading cars with alfalfa for San Francisco—the first shipment of the season.

Farmers have nearly harvested the second crop of alfalfa and expect to cut the third crop by October 3d.

Fourteen hundred cars of wheat and alfalfa were shipped from the Big Meadows of the Humboldt last year.

Geo. Lovelock, Jr., is arranging to haul two carloads of ore from the antimony mines at Hutcheson, to be shipped to the Star Works, San Francisco.

The sports of the State who are anxious for a week's outing in quest of game should visit Humboldt Lake, eight miles from Lovelock, where the graceful swan roosts, ducks quack and geese hawk and where the crack of a gun is seldom heard.

An owner of land in Honey Lake Valley says that farmers are paying \$38 a ton for gypsum as a fertilizer. We would advise Honey Lake to write to the Pacific Plaster Company, Lovelock, where gypsum, out of immense quarries, can be had for less than \$5 per ton.

## Is Life Worth Living?

Depends on the liver. If suffering with indigestion, or troubled with malaria, that tired, worn out feeling, you will consider life worth very little. But when relieved of these by taking Simmons' Liver Regulator you will count life a blessing and keep the Regulator on hand for any sudden attack of biliousness and sick headache. An active liver makes life a delight. Don't forget the Regulator with a red Z.

## Democratic County Central Committee Meeting.

There will be a meeting of the Democratic County Central Committee in the law office of Charles A. Jones on Thursday, September 15th, at 7 o'clock sharp. Business of importance to be transacted.

CHAS. A. JONES, Chairman.

"German Syrup"

Here is an incident from the South—Mississippi, written in April, 1890, just after the Grippe had visited that country. "I am a farmer, one of those who have to rise early and work late. At the beginning of last Winter I was on a trip to the City of Vicksburg, Miss., where I got well drenched in a shower of rain. I went home and was soon after seized with a dry, hacking cough. This grew worse every day, until I had to seek relief. I consulted Dr. Dixon who has since died, and he told me to get a bottle of Boschee's German Syrup. Meantime my cough grew worse and worse and then the Grippe came along and I caught that also very severely. My condition then compelled me to do something. I got two bottles of German Syrup. I began using them, and before taking much of the second bottle, I was entirely clear of the Cough that had hung to me so long, the Grippe, and all its bad effects. I felt tip-top and have felt that way ever since." PATRICK J. BIALS, Jr., Cayuga, Illinois Co., Miss.

Robberies in Apartment Houses.

Flat robberies have become fashionable. In fact, ever since the average family took to "flat living" the burglar and his associates have been at their wits' ends to know how to "burglar" premises where so many eyes and ears were open. But either such tenants have grown careless in their seeming security or the clever thief has discovered the weak points in their armor, for a number of robberies have been attempted and carried out with more or less success. In apartment hotels, where the entrances are watched by elevator boys and janitors, there is much less risk for occupants, but in flat houses, so called, the opportunity to enter and rob, unless every precaution be taken by the tenant, is undoubtedly great. It would not be wise to indicate by what means a very typical burglar might enter half the flats in town, though perhaps the criminal gentry know it as well as other folks; but it is not amiss to remind absentees of the day or summer that New York is full of flat thieves, and what New York has Boston is bound to copy, even to its faults and sins. Valuables like silverware and jewelry are rarely left in any house during the summer by their owners; therefore it is not silver or jewelry these thieves are after. Rugs, bric-a-brac of a portable nature, furniture, even, have been taken out bodily from more than one New York flat, and in one instance, where the tenant had merely gone away for the day, every article of clothing, costly furs and silk gowns were packed up and carted off in a wagon. The moral of this is never to leave home without some responsible person remains behind to take charge and prevent such disaster. But, according to the present style of living, this is almost impossible. There must come a time, however, when both mistress and maid wish to be "out," and only the cat can be made guardian of the little establishment. In that case the unostentatious abode is its own best protection, though the newly developed flat thief may have his own ideas in regard to the game being worth the candle.—Boston Herald.
